Missing Persons

The National Missing and Unidentified Persons System (NamUs) is a clearinghouse for missing persons and unidentified decedent records. NamUs is a free online system that can be searched by medical examiners, coroners, law enforcement officials and the general public to solve these cases.

Unidentified Persons

The **Unidentified Persons Database** contains information entered by medical examiners and coroners. Unidentified persons are people who have died and whose bodies have not been identified. Anyone can search this database using characteristics such as sex, race, distinct body features and even dental information.

Watch a 6-minute video: NamUs Behind the Scenes: How It Works, Why It Matters

The **Missing Persons Database** contains information about missing persons that can be entered by anyone; before it appears as a case on NamUs, the information is verified. NamUs provides the ability to print missing persons posters and even map out possible travel routes in a search for a missing person. Other resources include links to state clearinghouses, medical examiner and coroner offices, law enforcement agencies, victim assistance groups and pertinent legislation.

When a new missing persons or unidentified decedent case is entered into NamUs, the system automatically performs cross-matching comparisons between the databases, searching for matches or similarities between cases.

NamUs also provides free DNA testing and other forensic services, such as anthropology and odontology assistance.

After 22 Years, Mo. Family Finds Slain Sister

Gone but not forgotten: Mo. family gets resolution and help, with sister missing since 1987

By MARIA SUDEKUM FISHER Associated Press Writer
KANSAS CITY, Mo. February 5, 2010 (AP) The Associated Press

Share this story with friends

80 diggs Facebook Twitter Reddit StumbleUpon More

Stephanie Clack, left, and Alice Beverly hold photos showing their missing sister during an... (AP)

The last time Stephanie Clack saw older sister Paula Beverly Davis they were sharing a pizza at a Kansas City-area restaurant and talking about getting tickets to a Bon Jovi concert.

Later that night, she heard from a friend that Davis had gone missing.

That was 22 years ago. Now, thanks to a television show, a Web site, and two little tattoos — one of a unicorn and another of a rose — Clack knows more: Her sister was strangled and her body dumped in Ohio.

Funds sought for missing persons database 2,800 names posted online; fewer than 10 percent of agencies use

Associated Press
updated 4:37 p.m. ET, Sun., March 7, 2010

MINNEAPOLIS - A new online database promises to crack some of the nation's 100,000 missing persons cases and provide answers to desperate families, but only a fraction of law enforcement agencies are using it.

The clearinghouse, <http://www.namus.gov>, offers a quick way to check whether a missing loved one might be among the 40,000 sets of unidentified remains that languish at any given time with medical examiners across the country. NamUs is free, yet many law enforcement agencies still aren't aware of it, and others aren't convinced they should use their limited staff resources to participate.

Janice Smolinski hopes that changes — and soon. Her son, Billy, was 31 when he vanished five years ago. The Cheshire, Conn., woman fears he was murdered, his body hidden away.

Update Monday, April 11, 2011 01:00 AM EDT

Originally posted Monday, April 11, 2011 01:00 AM EDT

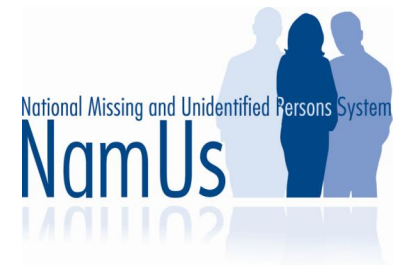

A SISTER NEVER STOPPED LOOKING

Paula Beverly Davis Last Seen: August 1987

Stephanie Clack last saw her older sister Paula Davis, then 21, when they went out for pizza and Davis dropped her off at home in Kansas City, Mo. That was August 1987. "She said, 'I love you. Talk to you tomorrow,' and drove off," says Clack, 37, of Kingsville, Mo. Her sister's disappearance led to their mother's nervous breakdown. After seeing a PSA about NamUs in October 2009, Clack plugged in her sister's age, race and gender and came up with 10 pages of missing women who fit Paula's description. Her sister's two tattoos, one a rose and the other a unicorn, narrowed it down to a woman who had been strangled to death, then buried as a Jane Doe in Englewood, Ohio, shortly after Paula vanished. She was reburied next to their mother last June. "I am sure they are dancing around in heaven together," says Clack.

- **Fingerprint Examination**
 - Assist in comparisons
- **Cross – Matching Feature**
 - Simultaneous searching of the Missing Persons cases against Unidentified Persons
 - The general public and public users will not see the possible matches
- **Case Tracking feature for ME/C cases on Unidentified Persons system**
 - Allows system to send automated emails when a case is modified

NCIC Import to NamUs

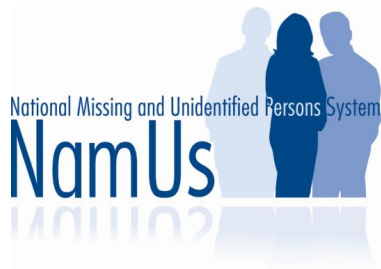

Automatically transferring NCIC cases into NamUs is a simple, four step process:

1. Contact your NCIC terminal operator.
2. Give them the NCIC-to-NamUs template (provided by NFSTC).
3. Ask the terminal operator to export your MP (or UP) cases in the format displayed in the template (CSV or Excel file).
4. Email the exported file to your NamUs Regional System Administrator.

REMEMBER, someone from your agency **MUST BE REGISTERED** with NamUs before cases will be published and available for review and case matching.

Welcome to NamUs Unidentified Persons

Welcome to the National Unidentified Persons System, a searchable database created to assist in solving cases that involve unidentified human remains. The system includes cases from throughout the United States and may be searched by demographics, physical characteristics, case numbers or other specific information. New records are added every day by medical examiners and coroners across the country, increasing the chances that these unidentified persons will be named. **Registration is not necessary to search the database, but coroners and medical examiners are required to register in order to enter case information.**

This site is part of NamUs, the National Missing and Unidentified Persons System. This database is designed to search for matches against the [Missing Persons System](#).

Register for Missing Persons here!

Welcome to NamUs Missing Persons

This site provides an opportunity for families, law enforcement agencies and investigators to search nationwide for missing persons using a variety of powerful search features. Anyone may search the database, but by registering in the system both law enforcement professionals and the general public will also be able to:

- Add new missing persons cases
- Add physical and circumstantial details, photographs, dental contacts and other critical pieces of information to a case
- Create and print missing persons posters
- Track multiple cases as information is added to the system

With your help, we can increase the number of missing persons cases solved each year providing closure for families and law enforcement officials nationwide.

Welcome to NamUs Registration

Registering on the NamUs system allows you to enter a Missing Persons report into the database. Before proceeding, please verify that you have the following information about the missing individual:

Required Missing Persons Case Information

- First Name
- Last Name
- Age
- Sex
- Race
- Height
- Weight
- DNA Status
- Dental Status
- City
- State
- Date LKA
- Circumstances
- Hair Color
- Eye Color
- Fingerprints Status
- Local Contact's Relationship

Add information such as photos, clothing, dental records and other details will help increase your chances of locating a missing person, but this is not required to enter a case.

If you are ready to register as a new user, click "Continue" below.

PLEASE NOTE:

If you want to file a crime or complaint that is not explicitly a Missing Persons Report, please contact your local law enforcement agency.

If you want to report an incident listed above or an incident wherein a person is injured, threatened, or otherwise placed in danger, you should immediately call 9-1-1.

Click Continue.

Terms Of Use

Welcome to findthemissing.org, national web-based tool which allows users from the general public to submit information on missing persons. The NamUs website, repository, and collaborating organizations (collectively, "NamUs", "findthemissing.org", "System" or "Website") are operated by Occupational Research and Assessment in association with the National Forensic Science Technology Center and the National Institute of Justice. By accessing or using this web site at www.findthemissing.org you (the "User") signify that you have read, understand and agree to be bound by these Terms of Use ("Terms of Use" or "ToU"), whether or not you have registered with the site. We reserve the right, at our sole discretion, to change, modify, add, or delete portions of these Terms of Use at any time without further notice. If we do this, we will post the changes to these Terms of Use on this page and will indicate at the top of this page the date these terms were last revised. Your continued use of this website after any such changes constitutes your acceptance of the new Terms of Use. If you do not agree to abide by these or any future Terms of Use, do not use or access (or continue to use or access) this Website. It is your responsibility to regularly check this website to determine if there have been changes to these Terms of Use and to review such changes.

PLEASE READ THESE TERMS OF USE CAREFULLY AS THEY CONTAIN IMPORTANT INFORMATION REGARDING YOUR LEGAL RIGHTS, REMEDIES AND OBLIGATIONS. THESE INCLUDE VARIOUS LIMITATIONS AND EXCLUSIONS, AND A DISPUTE RESOLUTION CLAUSE THAT GOVERNS HOW DISPUTES WILL BE RESOLVED.

Submissions

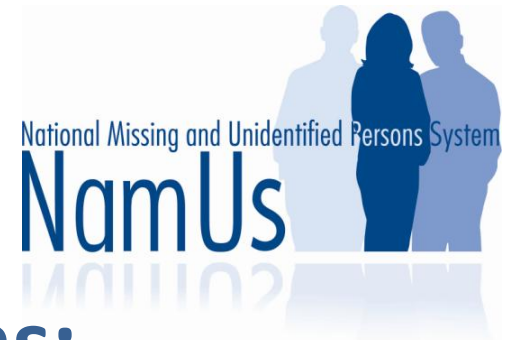

You acknowledge and agree that any questions, comments, suggestions, ideas, feedback or other information about the System ("Submissions"), provided by you to NamUs are non-confidential and shall become the sole property of NamUs. NamUs shall own exclusive rights, including all intellectual property rights, and shall be entitled to the unrestricted use and dissemination of these Submissions for any purpose, commercial or otherwise, without acknowledgment or compensation to you.

This Terms Of Use Agreement was last updated on December 15, 2008.

I "ACCEPT" these terms of use.

Register Cancel

Read Terms of Use.
You must 'accept' the terms of use by checking the box.
Then click register!
The system will send you an email.

Success

Solving Cases – Ronald Norman

- On December 8, 1991, Ronald Norman went missing from his home in Detroit, MI. He went for a walk and was never seen again. The following April, two fishermen found a body floating in Lake Erie.
- The medical examiner determined the victim's cause of death was drowning and buried the remains as "John Doe." In 2008, Mr. Norman's case was entered into NamUs.
- The Michigan State Police entered the "John Doe" into the UP database and the NamUs automated cross-matching feature flagged the two cases as a potential match. Similar features, specifically missing teeth, a skull injury and the type of clothing Mr. Norman wore when he was last seen helped confirm the match. On February 28, 2011, the medical examiner was able to positively identify Ronald Norman.

FDLE Cold Case Team Identifies Remains of 1976 Murder Victim

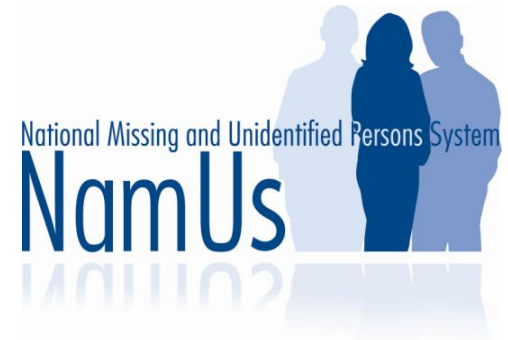

Apr 20, 2011

The Florida Department of Law Enforcement (FDLE) Tallahassee Regional Operations Center and the Dixie County Sheriff's Office today announced the skeletal remains of a deceased male originally found in Dixie County 35 years ago are those of missing person James Norris. Norris, a San Francisco resident, was 24, when he traveled to Florida and then disappeared. Investigators believe Norris was murdered and are seeking assistance from the public in finding his killer.

"The cold case team solved the mystery of who this man is, and now we need to solve the crime," said Special Agent in Charge Don Ladner. "It's time we brought some answers to James Norris' family and we encourage anyone with information about his activity in Florida to contact us."

"This being the oldest unsolved homicide in Dixie County, it is nice to know that the forensics that took place back then has allowed modern technology to bring closure to the family," said Dixie County Sheriff Dewey H. Hatcher. "We hope that our office and the Florida Department of Law Enforcement can move forward and bring further closure for the Norris family through this homicide investigation."

Missing Persons Matched with Unidentified Remains:

Name: Luis Fernandez

NamUs case #: MP #1768

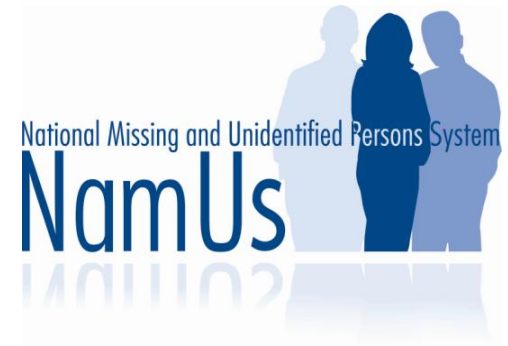

UP #1870

Person Missing: July 2007

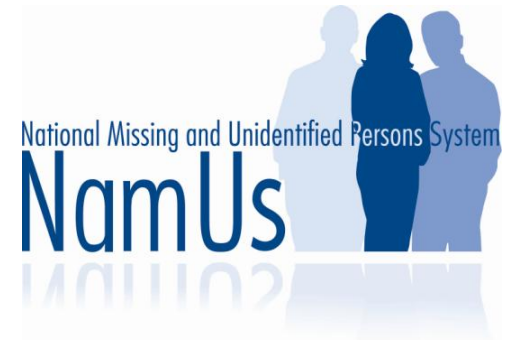

Body Found: December 3, 2007

Location: Ringgold County, Iowa

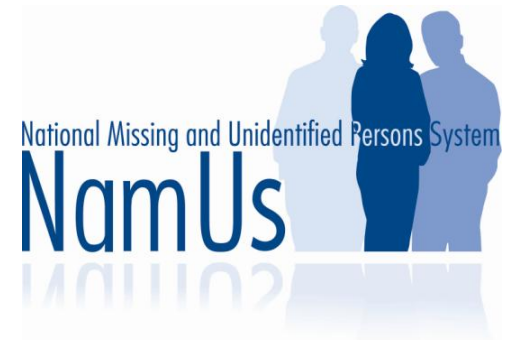

Body Identified: January 11, 2010

- July 2007 Luis Fernandez went missing in Omaha, NE
- Family reported him missing in June 2008
- Case was entered into NamUs in March 2009 after Officer Jim Shields of the Omaha Police Department learned about NamUs at a conference at the *University of North Texas Center for Human Identification*

- April 6, 2009 a civilian from Iowa contacted Officer Shields and alerted him of a possible match between Luis Fernandez – MP #1768 and UP #1870
- The ME in Ringgold County, Iowa was pulled into the case and began comparing dental records, which were ultimately inconclusive
- DNA family reference samples were taken from Fernandez’s family members and on January 11, 2010 the UP in Iowa was positively identified as Luis Fernandez

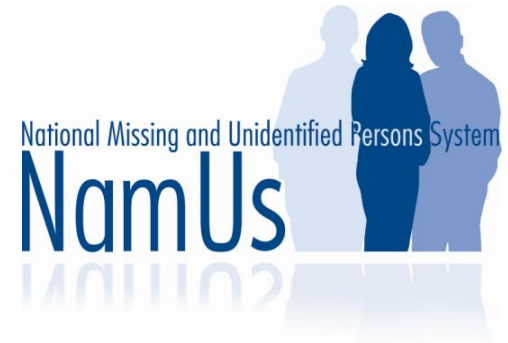

What was Accomplished?

1. One less open case for Law Enforcement
2. One less body in the Medical Examiner's Office
3. Closure for a family
4. Giving a person their identity back
