

**WEBINAR: What's your password? Security basics for small businesses**

**Thursday, 15 May at 12:30 EDT. [Click here](#) to register.**

**FREE [PCI Awareness eLearning](#) available to the first 500 people to register for the webinar\***

Did you know that 'password' is still one of the most common passwords used by businesses today? And passwords are one of the easiest ways for criminals to sneak into your system and access valuable customer payment information.

It's been estimated that nearly 80% of attacks are on small businesses, and that more than 40% of customers who have been victims of fraud as a result of such attacks, stop doing business with the merchant where the fraud occurred.

***Don't let this happen to you!***

In support of [National Small Business Week](#), join the [PCI Security Standards Council](#) for a brief webinar on basic tips that small businesses can take to protect customers' payment data and their business. Be one of the first 500 to sign up, and get **FREE [PCI Awareness eLearning](#)\***.

[Click here](#) to register for the webinar.
